### **Reorganization of party and soviet bodies of management in soviet political system in 1934 at places (on the example of Azov-Black Sea region)**

**V.V. Ozerin**

*It is considered the solutions of the XVII-th Congress of the CPSU(b), which determined the direction of organizational restructuring in the party and Soviet authorities in 1934. It is projected its implementation in the Azov-black sea region, and the influence on the specificity of the mechanism of power in the short term. It is emphasized positive and negative aspects in the changing system of mutual relations of administration bodies in the new conditions. In the presented work it was formulated the conclusion about a new phase in the centralization of the Soviet party-state control system and its disarrangement on this stage of the restructuring.*

**Keywords:** *Azov-Black Sea region, production-branch principle, system of control, political departments, departments and sectors of the regional Committee*
