Elements of integral state ideology for Russia

T.I. Eroshenko

It is described the possibility of Russia's withdrawal from the ideological crisis. In historical context, it is presented some positive spiritual values, which operated or operate in the social space of Russia as the likely elements of the new Russian ideology. The main way to the relative spiritual unity of the Russian society is through the struggle and at the same time the synergy of key social groups and political classes of the Russian society that is behind the elements of ideologies manifesting itself in Russian society.

Keywords: *ideology as a process, integrative ideology, government (state) ideology, moral (spiritual) values, social struggle, social synergy*
