Arcanology by N.P. Rudnikova as a system of esoteric principles and an initiatory tradition

I. Grekov

It is considered the basic ideas of esoteric knowledge presented in the work by N.P. Rudnikova "Sacred mysticism of Egypt. 22 steps of the initiatory path". This article emphasizes that the concept of the universe is presented by N.P. Rudnikova in the form of arcanology — the doctrine of the principles of the existence of the world, a person's place in the world order system, the essence of man, his "flaws", the need for spiritual evolution, an initiatory tradition. The symbolism of the arcane is considered, a characteristic and a brief description are given. The author concludes that arcanology by N.P. Rudnikova contains knowledge of both the source of being as a whole and knowledge of the specifics of each of its aspects.

Keywords: *esoteric knowledge, arcanology, consciousness, self-awareness, personality, egregor, esoteric path of transformation of consciousness, exoteric path of transformation of consciousness*
