Features and prospects for the development of inbound medical tourism in Russia in the direction of assisted reproductive technologies with China

S. Glotov, E. Chernyshev, G. Petrova

The issues of interaction with Chinese medical tourism agencies, including the problems of Russian IVF clinics when opening their own representative office in China, are considered. The prospects for the development of Chinese inbound medical tourism in the direction of assisted reproductive technologies in the context of tightening Russian legislation are analyzed.

Keywords: *inbound medical tourism, export of medical services, assisted reproductive technologies, development prospects, work with China, IVF, surrogacy*
