SOCIAL AND POLITICAL PHILOSOPHY

Global information society: historical and philosophical aspect of western concepts

A. Babenko

It is considered the main directions of the Western concept of the information society, differentiated by our domestic methodology. The epistemological roots of the idea of the information society, its rapid genesis and transformation into an idea of the global level are shown. The American and European authors of this concept, who stood at its origins, are presented. The first regional models of the information society are named: the systems "ГИП", "Tama – KKIS" and "HI – Ovis" (Japan), the program "TELIDON" (Canada), the project "TERESE" (Sweden).

Keywords: *infosociogenesis, post-industrial society, information society, global informatization, informatization and sovereignty, subjective reflection of processes*
