Conservatism as a constructive principle of K.P. Pobedonostsev's approach to political and law phenomena study

K.A. Salekhov

The article deals with the problem of conservatism as K.P. Pobedonostsev's constructive principle of the approach to the political-law phenomenon studies. The main reasons and motives for foundation of this approach to the political-law phenomenon studies as a theoretic-methodological construction is the main object of the article. K.P. Pobedonostsev in his legal thinking is based on the idea of natural law, arguing that its base is in the mind, conscience and sense of righteousness, focusing on the very idea of the natural-economic rights in its origin, it builds an alternative school of natural law concept.

Keywords: law, political-law phenomenon, theoretic-methodological construction, K.P. Pobedonostsev's constructive principle
