

MORAL ASPECTS OF LIBERAL ECONOMY FORMATION IN RUSSIA

L.K. Gurieva, I.E. Zangiev, D.R. Dzatseev

The article investigates the problem of the relationship of moral, ethical and economic trajectories of the cyclic development of modern society. Based on statistical and historical material, the authors showed that only a moral economy may have signs of stability. Also it justified the idea that the technological modernization of the economy will accelerate the development of only those countries that seek to preserve the spiritual, moral and ethical values.

Keywords: *economic crises, negative manifestations of liberal values, moral bases of the economy, management, innovation*
