To the question of the mystery of freedom N.A. Berdyaev

N. Gerleyn

It is analyzed the special concept of the vision of freedom, characteristic of the philosophy of N.A. Berdyaev. The question is raised about the allocation of "formal", i.e. meaningful and "material," i.e., meaningless freedom. The author is convinced of the self-evidence of human freedom, since the man perceives the world, and there by dominates the world, speaks of freedom from the world. N.A. Berdyaev comes to the conclusion that the opposition of faith and knowledge, with specific reasons, must be replaced by evidence of their interaction. N.A. Berdyaev has attempted to outline theosophical, religious, philosophical way out of the situation of the spirit, not the philosophy of freedom, and a new theology of freedom.

Keywords: *freedom, existence, need, mystic, intention, objectification, anthropodicy*
