Documentation of the nobility class organizations of Don Cossacks (on the materials of state archive of Rostov region)

N.V. Gorbunova

The features of the functioning of the organs of the nobility administration of the Don Army troops in the XIX century are considered. On the basis of the materials preserved in the State Archives of the Rostov Region, the structure of the nobility organs on the Don, the specifics of their formation and the activity profile are revealed. Attention is paid to the problem of the interaction of the elected organs of the estate of the noble self-government with the combined-arms control system. The policy of the central government in relation to the organs of the nobility class administration in the Don Army was controversial.

Keywords: *Don Army, the Cossacks, self-government, nobility, noble and co-operative organizations, military government, archival funds*
