Historical aspects of urban ore utilization problem solution

T.N. Savuskan, V. Gaponov, S. Gaponov

It is made a brief excursion into the history of urban ore utilization, which is associated with the history of the origin of anthropogenesis from Australopithecus, who participated in the cycles of the biosphere, so they did not create waste. The appearance of waste is associated with the appearance of ancient settlements, and man. The article analyzes UOU management in the USSR, in modern Russia and in Germany. There is an urgent need for UOU management in Russia at the present time. The experience of Germany is presented as an example of UOU management. The conclusions about the need to develop the concept of urban ore management in Russia is drawn.

Keywords: *urban ore utilization and its history, urban ore management concept, process of obtaining secondary fuel, waste - destroying enterprises*
