

THE PHILOSOPHY OF THE ERA OF GLOBALIZATION AND TECHNICALIZATION IN THE EDUCATIONAL PROCESS

Y. Petrova, L. Olifirenko

Our study is aimed at showing that the variability of education under the influence of the globalization process is no less than values, worldview, and human culture. Even if we assume that globalization has created a single text that is sent to the world in a standard way due to the existence of different contexts, whether historical, cultural, social, economic, or educational processes in different parts of the world, the result of the globalization in different contexts will not be the same.

Keywords: globalization, education, youth, universities, technology, trends
