Results and prospects of foreign economic activity of the Republic of North Ossetia-Alania

M.S. Dzhagaeva, S. Rubanovskaya

Most of the measures to establish international relations are mainly of a declarative-protocol nature and, as a result, do not have any impact on the socio-economic development of the republic. The process of increasing the export potential of RNO-Alania must begin with the types of economic activities that have the largest share in the region's GRP, as well as real opportunities for rapid growth, including through the availability of resources and experience.

Keywords: *export, import, foreign trade balance, export potential, commodity structure*
